

Change of Terminal Used at Naha Airport -Flying Peach becomes more convenient, more familiar-

- **Operations starting March 18, 2019 (Monday)**
- **Peach will shift its operations from the LCC-designated terminal to the new interconnected terminal at Naha Airport**
- **With direct access from the monorail station, etc., it is more convenient for customers**

Osaka 12 December, 2018 - Peach Aviation Limited (“Peach”; Representative Director and CEO: Shinichi Inoue) today announced that it will change the terminal it uses at Naha Airport starting March 18, 2019 (Monday).

On the occasion of the opening of the “Interconnected Terminal Facility at Naha Airport”, which connects the domestic and international passenger terminals of Naha Airport on March 18, 2019, Peach will move its operations to the new terminal from the LCC-designated terminal that is located in the cargo area, which it has been using until now.

With the change of terminal, on March 18, 2019, Peach plans to shift its domestic and international counters to the third floor of the new terminal. Moreover, this terminal can be accessed by the Okinawa Urban Monorail Yuirail, bus, taxi, and private cars. Customers will be able to fly Peach more comfortably without the need to transfer to the terminal using the free airport shuttle bus from the Naha Airport Terminal.

At present, Peach flies on a total of 6 routes from Naha Airport including 2 domestic routes and 4 international routes. In addition, since the start of the Osaka (Kansai) - Okinawa route in October 2012, more than 4 million customers have used the LCC-designated terminal that Peach is currently using.

Peach will continue its efforts to become the “Bridge between Japan and Asia”, and take various initiatives for the convenience and comfort of many more customers. Please look out for them.
